

## **ANTERIOR HEAD SUPPORTS: PROBLEMS AND POSSIBILITIES**

*SCOTT PICKETT, ATS*

**The A.R.T. Group**

This course will explore the world of anterior head supports and explain some of the problems associated with providing them. An in depth discussion of the mechanics behind the problems and the solutions will help the attendee select and provide the technology that best meets their client's needs.

### **Learning Objectives**

1. Learn to identify when seating alone may help eliminate the need for anterior head supports
2. Familiarize the student with the technologies available to support the head anteriorly
3. Learn to match these technologies to the client to attain the best results
